

AMENDMENTS TO CLAIMS

Claims 1-55 (canceled)

Claim 56 (previously presented): An instrument panel assembly for an automotive vehicle, comprising:

a first cross-vehicle molded plastic panel, the first plastic panel formed of a first plastic material;

a second molded plastic panel co-molded to the first panel, the second plastic panel formed of a second plastic material different from the first plastic material wherein:

- i. the first plastic material includes a pc/abs material;
- ii. the second plastic material includes a polyolefin material;
- iii. at least one of the first or second panels assists in defining an air duct for a vehicle cabin heating and cooling system; and
- iv. the first panel is joined to the second panel with one or more mechanical interlocks;

wherein the first cross-vehicle structure and second structure are adapted to be joined to a separate show surface of the vehicle; and

wherein one or both of the first panel and the second panel include an opening for receiving an instrument or a gauge.

Claim 57 (previously presented): An assembly as in claim 56 wherein the one or more mechanical interlocks includes a protrusion received in a channel.

Claim 58 (previously presented): An assembly as in claim 56 wherein at least one of the panels provides a vent that is configured to open into a passenger compartment of the vehicle.

Claim 59 (previously presented): An assembly as in claim 56 wherein the first and second panels are joined to each other at flanges of the first panel or the second panel, the flanges extending along sides of the first panel or the second panel.

Claim 60 (previously presented): An assembly as in claim 56 wherein the first panel and the second panel are molded to integrally incorporate the first panel and the second panel.

Claim 61 (canceled)

Claim 62 (previously presented): An assembly as in claim 56 wherein the first material is from a different plastic family than the second material.

Claim 63 (previously presented): An instrument panel assembly for an automotive vehicle, comprising:

a first cross-vehicle molded plastic panel, the first plastic panel formed of a first plastic material;

a second molded plastic panel joined to the first panel, the second plastic panel formed of second plastic material different from the first plastic material wherein:

- i. the first plastic material includes a pc/abs material;
- ii. the second plastic material includes a polypropylene material;
- iii. at least one of the first or second panels include openings suitable for receiving one or more components;
- iv. at least one of the first or second panels assists in defining an air duct for a vehicle cabin heating and cooling system; and
- v. the first panel is joined to the second panel with one or more mechanical interlocks.

Claim 64 (previously presented): An assembly as in claim 63 wherein the one or more mechanical interlocks includes a protrusion received in a channel.

Claim 65 (previously presented): An assembly as in claim 63 wherein at least one of the panels provides a vent that is configured to open into a passenger compartment of the vehicle.

Claim 66 (previously presented): An assembly as in claim 63 wherein the panels are joined to each other at flanges of the first panel or the second panel, the flanges extending along sides of the first panel or second panel.

Claim 67 (previously presented): An assembly as in claim 63 wherein the first panel and the second panel are molded to integrally incorporate the first panel and the second panel.

Claim 68 (canceled)

Claim 69 (previously presented): An assembly as in claim 63 wherein the first material is from a different plastic family than the second material.

Claim 70 (previously presented): An assembly as in claim 47 wherein the show surface is formed of a molded-in-color thermoplastic polyolefin.

Claim 71 (previously presented): An assembly as in claim 47 wherein one or both of the first panel and the second panel include an opening for receiving an instrument or a gauge.

Claim 72 (previously presented): An assembly as in claim 56 wherein the show surface is formed of a molded-in-color thermoplastic polyolefin.

Claim 73 (canceled)

Claim 74 (canceled)

Claim 75 (previously presented): An assembly as in claim 74 wherein the first cross-vehicle structure and second structure are adapted to be joined to a separate show surface of the vehicle.
